Graduation rates are calculated by taking the number of starts minus withdrawals divided by total starts (excluding students unavailable for graduation due to death, military duty, incarceration, or medical reason).

Employment rates are calculated by taking the number of graduates employed in the field of study divided by the total number of graduates (excluding graduates unavailable for employment due to further education, death, military duty, incarceration, or medical reason).

***Reporting dates determined by prescribed timeframes through the standards of accreditation.**

**Program has not been active long enough to have rates

Data has been rounded according to traditional mathetmatical standards
